

Balton is honoured to invite you for webinar:

**“One month strut coverage matters for duration of DAPT”**

**On-line meeting will take place on 30th June, at 2:30 pm CEST**

Webinar will highlight one of the most important topics in PCI field - duration of DAPT in patients treated with thin strut DES.

Recent randomized trials showed safety of shortened DAPT in patients with high bleeding risk treated with contemporary DES.

Webinar features experts in the field. Several important topics will be covered:

**Key points:**

- new generation thin-strut DES show rapid strut coverage
- shortening of DAPT is safe in patients with high bleeding risk
- Alex Plus DES are thin strut third generation DES with rapid strut healing after PCI
- Real-life registries showed excellent performance of Alex and Alex Plus thin strut DES

**Speakers:**

Elvin Kedhi, MD PhD

Wojciech Wojakowski, MD PhD

Marek Gierlotka, MD PhD

Michał Hawranek, MD PhD

Paweł Gąsior, MD PhD
